Using Remo Repair MOV

This Section explains, getting started with the tool, where can you download it from, how to get free activation keys and a walk through of the tool.

Getting Started with Remo Repair MOV

Download the Demo Version of the software from [here](#)

This tool provides a Hassle free approach to repair broken, unplayable MOV, and MP4 Files.

Follow this Step by Step Guide to Repair MOV / MP4 Video File on Windows and Mac

- Click on Download Now button (Select as per your OS - Windows / Mac)
- Once downloading process is completed, install and launch the application by double - clicking on the downloaded file (remo-repair-mov.exe). To find the file just press CTRL + J, this will open all downloads.
- From the Main window select one “**healthy MOV file**” that is having the same codec as the corrupt MOV video by clicking on Healthy File option as a reference to fix corrupt MOV & MP4 files
- Next choose the path of the corrupt or damaged MOV file to be fixed by clicking on the “**Corrupted File**” button (As stated before, make sure both healthy file and corrupted movie file were shot on the same camera, cam-corder or phone)
- Now, press “**Repair**” button to start the MOV / MP4 video file repair process
- After completion of repair process, you can “**preview**” the repaired file by clicking on Preview button or
- Click Save to “**save**” the MOV file on a desired location
